

PROJECT REQUIREMENTS SPECIFICATION REGISTER									
Traceability Matrix & Verification Tracking • FR-01 to FR-06 & NFR-01 to NFR-03									
TOTAL REQUIREMENTS		FUNCTIONAL REQS				NON-FUNCTIONAL REQS			
9		6				3			
Req ID	🔗	Category	Requirement Title	Description & Acceptance Criteria		🔗 Priority	🔗 Status	Target Milestone	Verification Method
FR-01		Functional	User Authentication & Authorization	Enable secure sign up, login via OAuth2/SSO, session token management, and MFA enforcement for administrative		High	Approved	Sprint 1	Automated Security Test
FR-02		Functional	Role-Based Access Control (RBAC)	Enforce granular permissions and access boundaries across Admin, Project Lead, Contributor, and Viewer roles.		Critical	In Progress	Sprint 1	Permission Matrix Audit
FR-03		Functional	Data Export & Multi-Format Reporting	Allow authenticated users to export datasets and filtered project views into CSV, PDF, and XLSX formats.		Medium	In Progress	Sprint 2	Functional UI/API Test
FR-04		Functional	Real-Time Notification Dispatch	Trigger asynchronous in-app banner alerts and external email notifications upon task status transitions or assignments.		Medium	Not Started	Sprint 2	Event Dispatch Test
FR-05		Functional	Audit Logging & Activity Tracking	Maintain an immutable, queryable audit log of all record modifications, logins, and permission changes with UTC		High	Approved	Sprint 3	System Log Inspection
FR-06		Functional	Automated Backup & Point-in-Time Recovery	Perform scheduled daily automated database backups with verified point-in-time recovery to restore state within 30		Critical	Not Started	Sprint 3	Disaster Recovery Drill
NFR-01		Non-Functional	Performance & API Response Latency	Ensure 99% of API requests resolve in under 200ms under sustained load of 1,000 concurrent active users.		High	In Progress	Sprint 2	Load & Stress Test
NFR-02		Non-Functional	System Availability & High Reliability	Maintain guaranteed 99.9% application uptime per calendar month, excluding announced scheduled maintenance.		Critical	Approved	Sprint 3	SLA & Uptime Monitoring
NFR-03		Non-Functional	Data Encryption & Regulatory Compliance	Enforce end-to-end data encryption using AES-256 for data at rest and TLS 1.3 for all in-transit communications.		Critical	Approved	Sprint 1	Vulnerability Assessment
